REFORM DECO
REFORM X-SPACE

Ultimate Safety & Art

Functional Space Materials Provider

Established in 1996 with H/Q in Shanghai, factory and R&D center located in JIASHAN, Zhejiang Province. Focusing on research and innovation, REXIN has become a leading High Pressure Laminate (HPL) manufacturer in China. Other than export sales, REXIN has solid footprint in major cities in China.

In 2021, REXIN became a subsidiary of Guangdong Tianan New Materials (603725.SH), strengthening its technical and market competitiveness through industrial collaboration. REXIN products conform to ISO9001, ISO14001, ISO45001, ASTM G21, JIS Z2801, ISO22196, meet or exceed the NEMA LD-3, BS EN438, ISO4586-2 standards, and certified by UL GREENGUARD, GREENGUARD GOLD, Singapore GREEN Label, DNV EC MED-B+D Certification and honor as SEFA membership and complies with FSC COC.

Embracing the brand spirit of "Innovation Achieves Transcendence," REXIN focuses on Ultimate Safety & Art. Its portfolio includes eight eco-friendly product series, such as High Pressure Decorative Laminate (HPL) and Non-Combustible High Pressure Melamine Board (TAIKA), widely applied across five major scenarios: walls, floors, furniture, ceilings, and doors, in residential, commercial, outdoor, and public transportation spaces.

Guided by a customer-centric approach, REXIN delivers tailored solutions to meet specific needs, striving to "Reform Deco, Reform X-Space" and offer global space solutions that blend safety and art.

TAIKA

Ultimate Safety & Art

Featuring superior antibacterial and antiviral properties, the product effectively inhibits bacterial growth. It is stain-resistant, easy to clean, and disinfectant-resistant. Certified as Class A non-combustible, it offers efficient, dust-free, and quick installation. Ideal for both residential and commercial applications, it is particularly suited for hospitals, malls, schools, and similar settings, providing safe, efficient, and durable wall protection and decorative solutions.

Featuring advanced nano-metal coating technology, the product showcases a metallic texture and gloss with excellent abrasion resistance. Its color is durable and stable. Certified for fire safety, it is reliable and suitable for commercial, residential, and furniture applications. With its unique material and superior performance, it meets functional requirements while adding a modern and creative touch to spaces, making it an ideal choice for designers and clients.

Style Metal

Fresh & Creative

Ever-Changing Art X-Space

Embracing the spirit of "Innovation Achieves Transcendence," REXIN breaks the boundaries of traditional decorative materials, merging function and art with innovative colors, textures, and product performance.

It reforms X-Space, offering users a dynamic and multi-dimensional experience that evolves with time and environment. This is a realm filled with impermanent beauty. Here, every potential user creates not only space but also change, subtlety, and the present moment.

iCORE Crafted Tinted Cores

Inspired by classic colors from the natural spectrum, the design presents a consistent color scheme, creating a seamless and unified elegance. This color consistency reduces processing steps, improving installation efficiency. It is widely applicable to residential, commercial, and furniture manufacturing, providing high-quality solutions for various spaces and products.

Magnetic TAIKA & HPL

Customized Magnetic Wall

Combining writable decorative surfaces, a magnetic layer, and special core material, this product is suitable for walls, furniture, and other applications. The magnetic layer can attract magnetic items, enhancing space utilization. The writable surface allows for repeated writing and erasing, providing a flexible and efficient solution for modern interior design.
